

Q: Is the QuickBooks software I download the same as the CD-ROM version?

A: Yes. When you download most QuickBooks products, you receive the same full working version of software you would purchase via the website with the option to download other extras (templates, manuals, etc) separately, at your convenience. We save your order information online and offer convenient access should you need anything further in the future.

Q: What are the technical requirements to download QuickBooks?

A: Our most satisfied customers meet three specific technical requirements before deciding to download QuickBooks:

- A high-speed Internet connection (DSL, cable modem, or higher) to accommodate the large file size. Customers with dial-up connections are highly encouraged to purchase a CD-ROM rather than downloading.
- For Windows: Internet Explorer 6.0 or higher, to enable the QuickBooks Download Manager to properly manage the download for you. For Mac: Safari 2.0 or higher
- 2.5 GB free disk space for the installation. After installing QuickBooks, you can delete the installation program from your computer to free up disk space. (Note: if you are installing QuickBooks: Pro, or Premier, the installer gives you the option to auto-delete the installation files.)

Q: How do I get help if I encounter technical problems downloading or installing?

A: Call our technical support center weekdays from 6am to 6pm Pacific time at 877-406-1261 if you have any problems while downloading and installing QuickBooks.
